

Testimonial

Vladimir Tikhonov

Chief Mechanical Engineer
of Angarsk Petrochemical Company, JSC

We started to cooperate with DYNAMICS SPC from Omsk 20 years ago. We wanted to cut the costs for equipment repair and most of all ensure the safe operation of the pump and compressor equipment.

The System allowed us to perform condition-monitored repair of our equipment. So we were able to give up the scheduled preventive repair. We wish DYNAMICS SPC continued success in their search of new trends that will make it possible to diagnose all the equipment operating by companies. Thank you for your attention.
