## Igor Pavlov

Director General of  
Angarsk Petrochemical Company, JSC

We have been cooperating with DYNAMICS SPC for more than 20 years. The COMPACS system was a completely new one for us but it had an instant effect. The system is simple in performance, efficient and cost-effective. As we operate and repair our machinery according to its condition, we are confident that the system provides results and, most crucially, decreases accident rates due to timely prediction and online control of machinery operation, which I find very important.
