## **Servey Gavrin**

Director General of Genenergomontazh, LLC  
Former Chief Mechanical Engineer of  
Achinsk Refinery (2014)

The COMPACS system was implemented at the Achinsk Refinery as one of the first systems of that kind at the downstream industry. Thanks to that system, our Refinery switched to condition-based maintenance of machinery, and that considerably reduced the number of unplanned repairs. Today, we plan further implementation of the systems at all the facilities under construction right now.
