Vladimir Durosov

Chief Mechanical Engineer of
LUKOIL-Volgogradneftepererabotka, LLC (1996)

Our cooperation with DYNAMICS SPC began in 1996. It all started from a pilot project of diagnostic units for pumps implemented at the Volgograd Refinery. Firstly, we assembled the units, and then, they implemented the bench systems. The DYNAMICS' system allowed us to increase the quality of repairs and pump maintenance. So, we switched from scheduled repairs to preventive maintenance based on the actual condition of the machinery.
